■ **Drittes Quartal 2024**

Das dritte Quartal endete mit einem deutlichen Rückgang der Inflation, Anzeichen einer Konjunkturabschwächung und Änderungen in der Geldpolitik der Zentralbanken. Die US-Wirtschaft, die mehrere Quartale lang mit ihrer Widerstandsfähigkeit überrascht hatte, zeigte erste Anzeichen von Schwäche. Der Markt hat das Risiko einer Rezession einkalkuliert. Europa, insbesondere Deutschland, enttäuschte erstmals. Die fehlende Dynamik führte zu einem sehr langsamen Wachstum. Am Ende des Quartals erholten sich die Finanzmärkte trotz starker Volatilität im August, angetrieben von der Erwartung einer Zinssenkung und dem chinesischen Konjunkturprogramm. Das Quartal war auch geprägt von politischer Unsicherheit, vor allem durch die bevorstehenden US-Wahlen, den anhaltenden Konflikt in der Ukraine und die Gefahr eines Krieges im Nahen Osten. Gold erreichte Rekordhöhen von über 2600 USD je Unze.

USA

Die US-Wirtschaft zeigte Anzeichen einer Verlangsamung, und die Inflation ging weiter zurück. Der Verbraucherpreisindex (CPI) auf Jahresbasis sank von 3 % im Juni auf 2,5 % im August, und der von der Federal Reserve (Fed) verwendete Preisindex der persönlichen Konsumausgaben (PCE) fiel auf 2,2 % (2,7 % beim Kernindex). Die Prognosen deuten auf eine Rückkehr zum 2 %-Ziel im Jahr 2025 hin. Die wichtigste Veränderung gab es am Arbeitsmarkt. Die Arbeitslosenzahlen im August fielen schlechter als erwartet aus, und auch im September gab es Anzeichen für eine unsichere Lage. Es wurden weniger Arbeitsplätze geschaffen und die Anträge auf Arbeitslosenhilfe steigen leicht an. Dies führte zu Unsicherheiten in Bezug auf die Stärke der US-Wirtschaft. Zudem schrumpfte das verarbeitende Gewerbe weiter: Der ISM-Index sank im August auf 47,2 und verzeichnete damit den fünften Monat in Folge einen Rückgang der Aktivität. Auch beim Konsum der privaten Haushalte gab es Anzeichen einer Verlangsamung, insbesondere wegen des sinkenden Verbrauchervertrauens, das beeinträchtigt wurde durch die Befürchtung eines Abschwungs auf dem Arbeitsmarkt.

Der Abwärtstrend der Inflation in Verbindung mit einer Verschlechterung des Arbeitsmarkts überzeugte die Fed von einer Kursänderung. Auf dem Jackson Hole Symposium bereitete ihr Präsident Jerome Powell die Menschen darauf vor. Im September senkte die Fed ihre Leitzinsen um 50 Basispunkte von 5,25 % auf 4,75 %. Damit bekräftigte sie ihre Absicht, die Wirtschaft zu stützen und Vollbeschäftigung zu gewährleisten.

Für zusätzliche Unsicherheit sorgten die Wahlen in den USA am 5. November. Kamala Harris trat erfolgreich die Nachfolge von Joe Biden an. Sie gab der Kampagne der Demokraten neuen Auftrieb und lag nun Kopf an Kopf mit Donald Trump. Auf den ehemaligen Präsidenten wurden zwei Attentate verübt. Das verschärfte die Spannungen in einem ohnehin schon tief gespaltenen Land weiter. Die Anleger prüften genau die Vorschläge der Kandidaten, insbesondere in den Bereichen Steuern, Wirtschaftsregulierung und Umweltpolitik. Die von Harris angeregte Umweltpolitik und die von Trump versprochenen Steuersenkungen könnten die wirtschaftliche Entwicklung des Landes stark beeinflussen.

Eurozone

In Europa konsolidierte sich im dritten Quartal die im Frühjahr begonnene Erholung. Das Wachstum blieb aber bescheiden. Im August stieg das BIP der Eurozone nur um 0,6 %. Dabei gab es allerdings erhebliche Unterschiede zwischen den wichtigsten Volkswirtschaften. Umfrageprognosen wie der Einkaufsmanagerindex (PMI) der Hamburg Commercial Bank deuten nun auf eine Schrumpfung der Aktivität hin, im Dienstleistungssektor sogar mit negativer Aktivität. Deutschland, die größte Volkswirtschaft der Eurozone, zeigt weiterhin Anzeichen von Schwäche, mit einem Wachstum von nahezu Null und einem schleppenden Industriesektor. Die Bundesbank sieht die Wirtschaft am Rande einer Rezession. Der Einkaufsmanagerindex für das verarbeitende Gewerbe in Deutschland sank im August weiter von 42,4 auf 40,3. In Frankreich und Spanien sieht aus positiver aus. Dort verzeichnete der Binnenkonsum vor allem in den Bereichen Tourismus und Konsum (in Frankreich begünstigt durch den „Olympia-Effekt“) ein anhaltendes Wachstum.

Die Inflationsrate in der Eurozone setzte ihren Abwärtstrend fort. Im August lag sie bei durchschnittlich 2,2 % gegenüber 2,6 % im Juli. Die Kerninflation blieb stabil bei 2,8 %. Hauptursache des Inflationsdrucks war weiterhin der Dienstleistungssektor. Industriegüter und der Energiesektor trugen dagegen zum Rückgang bei. In Frankreich lag die Inflationsrate Ende September mit 1,5 % auf Jahresbasis weit unter den Erwartungen, weil Ökonomen 2 % prognostiziert hatten (die europäische Messgröße). Vor dem Hintergrund des schwachen Wachstums und des anhaltenden Rückgangs der Inflation senkte die Europäische Zentralbank (EZB) im September erneut ihre Leitzinsen und reduzierte den Einlagensatz von 3,75 % auf 3,5 %. Christine Lagarde warnte jedoch, dass das Ausmaß künftiger Senkungen von der Entwicklung der Inflation und der Lohndynamik abhängen werde.

Schwellenmärkte

In China blieben die Daten im dritten Quartal hinter den Erwartungen zurück: Die Industrieproduktion wuchs um 4,5 % statt der im August erwarteten 4,7 %, und die Einzelhandelsumsätze enttäuschten. Kern des Problems ist nach wie vor der Immobilienmarkt mit sinkenden Preisen und rückläufigem Umsatz. Diese Situation belastet den Konsum und die Beschäftigung. Peking versucht, die gedämpfte Inlandsnachfrage wieder in Schwung zu bringen. Ende September kündigte die Regierung mehrere umfangreiche Maßnahmen an, um die Hypothekenkredite und den Konsum anzukurbeln und den chinesischen Aktienmarkt zu unterstützen.

Indien hat weiterhin eine dynamische Wirtschaftsentwicklung mit einem Wachstum von 6,7 % zwischen April und Juni und voraussichtlich über 6 % in diesem Jahr, wengleich dies unter dem Vorjahresniveau liegt. Die Wirtschaftsreformen und die Binnennachfrage unterstützen diese Dynamik, trotz anhaltendem Inflationsdruck, insbesondere im Lebensmittelsektor. Die anderen Schwellenländer verzeichneten kontrastierende Ergebnisse, insbesondere in Lateinamerika. Dort bereitet die Inflation immer noch große Probleme. In Brasilien will die Zentralbank entgegen der Empfehlung der Regierung die finanziellen Bedingungen verschärfen.

Zinssätze

Das dritte Quartal 2024 markiert einen Wendepunkt für die Anleihemärkte, denn die Zentralbanken starteten einen Zinssenkungszyklus. In den USA sanken die Anleiherenditen. Der Zinssatz für 10-jährige Laufzeiten stieg zunächst auf 4,5 %, ging aber unmittelbar danach wieder zurück auf 3,75 %. Die Renditen für Schatzanweisungen mit 2-jährigen Laufzeiten reagieren stärker auf die Entscheidungen der Fed. Zwischen Juni und September fielen sie von 4,8 % auf 3,6 %. Beschleunigt wurde diese Dynamik durch enttäuschende Beschäftigungszahlen und ein wiederauflebendes Rezessionsrisiko, denn der Markt preiste weitere Zinssenkungen der Fed ein. Die amerikanische Renditekurve wird daher steiler, da die Fed ihre Bilanz reduziert und der Markt eine Senkung der Leitzinsen erwartet. In Europa waren die Zinssenkungen weniger aggressiv, die Tendenz ist aber dieselbe. In Deutschland sank der Zinssatz für Anleihen mit 10-jährigen Laufzeiten auf etwa 2,1 %, ebenso wie die Rendite für Anleihen mit 2-jährigen Laufzeiten. In Frankreich lag der Zinssatz bei unter 3 %. Für eine Beeinträchtigung sorgten hier die Herabstufung der Kreditwürdigkeit des Landes, eine deutliche Verschlechterung des Defizits für 2024 (es steuert auf 6,3 % des BIP zu) und die große Unsicherheit bezüglich des Haushalts wegen einer fehlenden Regierungsmehrheit. Die Zinsdifferenzen zwischen europäischen Ländern blieben relativ stabil. Die Differenz zwischen Frankreich und Deutschland stieg allerdings auf rund 80 Basispunkte an. Die Kreditmärkte entwickelten sich zwar positiv, sind aber nach wie vor volatil. In einem inzwischen ungewissen wirtschaftlichen Umfeld achten Anleger vor allem auf die Qualität der Bilanzen und die Entwicklung der Gewinnspannen.

Aktien

An den Aktienmärkten war das Quartal gekennzeichnet durch erhöhte Volatilität, insbesondere im Technologiesektor. Nach der überraschenden Zinserhöhung der Bank of Japan und den enttäuschenden US-Arbeitsmarktdaten kam es Anfang August kurzzeitig zu einer Korrektur. Nach den enttäuschenden Ergebnissen von Nvidia, einem der Hauptakteure des Halbleiterssektors, kam es auch dort zu einer starken Korrektur. Außerdem werden Zweifel laut an der Rentabilität massiver Investitionen in künstliche Intelligenz. Der S&P 500 (in USD) setzte seinen Aufwärtstrend aber fort, unterstützt vom Gesundheitssektor und Basiskonsumgütern (+20 % seit Jahresbeginn). Wir beobachten eine Neugewichtung der Wertentwicklung über Sektoren und Stile hinweg.

In Europa verzeichnete der Euro Stoxx 50 einen starken Anstieg dank einer kräftigen Erholung von Luxusgüteraktien. Am Quartalsende erhielten sie Auftrieb durch das chinesische Konjunkturprogramm, das bessere Konsumdaten erwarten lässt. Der Bankensektor setzte sein Wachstum im Laufe des Quartals vor dem Hintergrund steilerer Zinskurven fort. Begünstigt durch den Luxussektor holte der CAC 40 zum Ende des Berichtszeitraums leicht auf. Der deutsche Dax 30 und der britische FTSE 100 beendeten den Berichtszeitraum im Plus.

In Japan beendeten die Aktienindizes den Berichtszeitraum mit einem deutlichen Rückgang. Sie wurden belastet durch die rasche Aufwertung des Yen und den Mini-Börsencrash Anfang August nach der überraschenden Zinserhöhung der Bank of Japan. Chinesische Aktien hatten monatelang unterdurchschnittlich abgeschnitten und die Indizes den niedrigsten Stand seit fünf Jahren erreicht. Ende September kam es aber nach Ankündigungen der Zentralbank und Maßnahmen zur Stützung des Marktes zu einer äußerst starken Erholung und in wenigen Sitzungen legten sie um 20 % zu. Indien wiederum bricht weiterhin Rekorde. Der wichtigste indische Aktienindex NIFTY 50 verzeichnete im Laufe des Quartals mit 7,5 % einen deutlichen Anstieg.

■ **Viertes Quartal 2024**

Das vierte Quartal 2024 war geprägt vom Sieg der Republikaner unter Donald Trump in den USA und dem dortigen anhaltenden Wachstum. Diese Dynamik steht im Gegensatz zur schwachen Entwicklung in Europa und China. Die Zentralbanken setzten ihre Zinssenkungszyklen fort. Zugleich behielten sie das Risiko eines Wiederauflebens der Inflation im Blick. Die geopolitischen Risiken sind nach wie vor sehr präsent. Im Allgemeinen setzten die Finanzmärkte ihre positive Entwicklung fort, und letztendlich wird 2024 für Anleger ein gutes Jahr sein.

Die Zahlen in diesem Bericht beziehen sich auf die Vergangenheit und lassen nicht unbedingt auf die zukünftige Wertentwicklung schließen.

Gesamtwirtschaftliche Entwicklung

USA: Politischer Wandel und wirtschaftliche Resilienz

Die US-Wirtschaft erwies sich im vierten Quartal erneut als widerstandsfähig, auch wenn gewisse Schwächen fortbestehen. Das Wachstum des BIP erholte sich im dritten Quartal um 2,8 % und bestätigt damit den positiven Trend für 2024. Ein führender Indikator wie der ISM-Index für das verarbeitende Gewerbe erreichte im November den Stand von 48,4 und schrumpfte somit. Dies zeigt, dass es der Industrie an Dynamik mangelt. Im Dezember verbesserte sich der Index aber (49,3). Der Dienstleistungssektor hatte sich bis dahin gut behauptet, legte aber Anzeichen von Schwäche an den Tag. Der ISM-Dienstleistungsindex lag im November bei 52,1 und damit unter dem im Oktober verzeichneten Wert von 56. Die Konsensschätzungen von 55,5 wurden somit enttäuscht. Der Konsum ist einer der wichtigsten Antriebsfaktoren der Wirtschaft. Dank der stabilen Haushaltseinkommen bleibt er stark, ist aber einem anhaltenden Inflationsdruck ausgesetzt. Die Verbraucherstimmung war weiterhin gut, wie der Michigan Consumer Sentiment Index zeigt. Im Dezember stieg er gegenüber November um 2,8 Punkte. Der Arbeitsmarkt übertraf im November die Erwartungen bei weitem, es wurden 227.000 Arbeitsplätze geschaffen. Das zeugt von einer bemerkenswerten Resilienz und leistete einen Beitrag zu den positiven Verbraucheraussichten. Die Arbeitslosenquote stieg jedoch leicht an und erreichte 4,2 % (+0,1 % im Berichtszeitraum), bleibt aber unter Kontrolle.

Der Verbraucherpreisindex ist seit Ende des Jahres nicht mehr gesunken. Im Oktober stieg er auf 2,6 % und im Dezember auf 2,7 %. Der Druck bleibt also grundsätzlich hoch. Die Federal Reserve setzte jedoch ihre Politik der schrittweisen Zinssenkung fort. Im Laufe des Quartals senkte sie ihren Leitzins um 0,5 Prozentpunkte auf 4,5 %. Die Fed geht davon aus, dass der Arbeitsmarkt kein Inflationsfaktor mehr und der Beitrag des Wohnungsbaus ein verzögerter Effekt ist, der abklingen wird. Sie bleibt jedoch vorsichtig, denn ihr bevorzugtes Inflationsmaß, der Kernindex der persönlichen Konsumausgaben (PCE), liegt weiterhin bei 2,8 %. Die Fed möchte zurückkehren zu einer neutralen Position. Angesichts der Umsetzung der Zoll- und Einwanderungspolitik der neuen Trump-Regierung behält sie dabei das Risiko einer Rückkehr der Inflation im Auge.

Europa: schwaches Wachstum und politische Instabilität

Europa befindet sich nach wie vor in einem düsteren wirtschaftlichen Umfeld. Es ist gekennzeichnet durch eine schwächere Auslandsnachfrage, wachsende Handelsspannungen, interne wirtschaftliche Divergenzen und eine relativ instabile politische Lage. Die Wachstumsdynamik verbesserte sich mit der Veröffentlichung des BIP der Eurozone für das dritte Quartal. Im Vergleich zum Vorjahr stieg es um 0,9 %. Auch der Arbeitsmarkt verbesserte sich weiter. Die Arbeitslosenquote in der Eurozone lag bei 6,3 %. Führende Indikatoren für das verarbeitende Gewerbe in der Eurozone (HCOB) schrumpften weiterhin und lagen zum Jahresende unter den Erwartungen. Enttäuschung herrschte auch bei Dienstleistungen, sie steuern auf eine kurzfristige Abschwächung zu. Deutschland befindet sich das zweite Jahr in Folge in einer Rezession. Das BIP schrumpfte im dritten Quartal um 0,3 % gegenüber dem Vorjahr. Im Industriesektor, der Hauptstütze der deutschen Wirtschaft, ist die Nachfrage schleppend, noch verschärft durch die Handelsspannungen mit China und den USA. Besonders betroffen ist der Automobilssektor, in dem zunehmend Arbeitsplätze abgebaut werden. Die Regierung von Olaf Scholz verlor ihre Mehrheit, und am 23. Februar 2025 finden neue Parlamentswahlen statt. In Frankreich ist der „Olympia-Effekt“ verblasst. Dies ebnete den Weg für politische Unsicherheit. Die Prognosen für das öffentliche Defizit verschlechtern sich weiter und 2024 erreicht es 6,1 % des BIP. Der Regierung von Ministerpräsident Barnier gelang es nicht, den Haushalt für das Jahr 2025 zu verabschieden und steht in der Kritik. Wenige Stunden nach der Ernennung von François Bayrou zum Premierminister stufte Moody's französische Schuldtitel herab.

Während die Inflation von 2 % im Oktober auf 2,3 % im November anstieg (jährliche Veränderung des harmonisierten Preisindex), senkte die Europäische Zentralbank ihre Leitzinsen im Laufe des Quartals um 50 Basispunkte und brachte den Einlagensatz auf 3,00 %. Die Bank of England senkte ihren Leitzins um 25 Basispunkte auf 4,75 %.

Schwellenländer:

In China unterstützte die Regierung weiter den Immobiliensektor und konzentrierte ihre Bemühungen auf die Sanierung der Bankbilanzen und der lokalen öffentlichen Finanzen. Der schwache Immobiliensektor belastet jedoch weiterhin das Vertrauen der Haushalte. In China besteht auch das Risiko einer Deflation (Inflation von 0,3 % im Oktober und 0,2 % im November im Jahresvergleich), da die Exportdynamik nachlässt. Durch eine Erhöhung der US-Zölle nach der Rückkehr von Donald Trump an die Macht könnte sich dies weiter verschlechtern. Dieses Umfeld bremst das Wachstum weiterhin, und wahrscheinlich wird es unter den angestrebten 5 % liegen. In Indien bleibt die gesamtwirtschaftliche Dynamik positiv (unterstützt durch umfangreiche Investitionen in die Infrastruktur), trotz des enttäuschenden BIP von 5,4 % im dritten Quartal 2024, statt der erwarteten 6,5 %. Spannungen auf dem Arbeitsmarkt und eine Verlangsamung in einigen strategischen Sektoren wie dem Technologiesektor verschlechtern die Wachstumsaussichten.

In Brasilien setzt sich das anhaltende Wachstum fort. Den Internationalen Währungsfonds veranlasste dies dazu, seine Prognose für 2024 von 2,1 % auf 3 % anzuheben. Die Zentralbank hob die Zinssätze angesichts des Wiederauflebens der Inflation um 50 Punkte an. Der Selic-Satz liegt nun bei 12 %.

Finanzmärkte

Anleihemärkte: Unterschiedliche Trends in den USA und Europa

In den USA stiegen die Renditen von Staatsanleihen weiter an und erreichten am Ende des Berichtszeitraums 4,58 %. Grund für diese Tendenz ist die Resilienz der US-Wirtschaft und der erwartete Anstieg des Haushaltsdefizits durch angekündigte Steuersenkungen des künftigen Präsidenten Donald Trump. Auch das Risiko einer Rückkehr zur Inflation im Jahr 2025 spielt eine Rolle. Kurzfristige Zinssätze für zweijährige Laufzeiten schlugen einen ähnlichen Weg ein. In einem von Inflation geprägten Umfeld stiegen sie im Dezember auf 4,36 %. Dies beschränkte den Zinssenkungszyklus der Fed.

In Europa gibt es eine erhebliche Diskrepanz zwischen einem schneller als erwarteten Rückgang der Inflation und einem schwachen Wachstum. Dies deutet auf weitere Zinssenkungen der EZB hin. Die Renditen deutscher Anleihen mit 10-jährigen Laufzeiten gingen zurück auf 2,1 %. Französische Anleihen (OAT) erreichten dagegen 2,9 %, stiegen am Ende des Berichtszeitraums aber wieder auf 3,20 %. Nach dem Misstrauensvotum gegen die Regierung von Michel Barnier weitete sich der Abstand zwischen französischen und deutschen Anleihen auf über 80 Basispunkte aus. Umgekehrt verringerte sich der Abstand zwischen den Zinssätzen italienischer und spanischer gegenüber deutschen Staatsanleihen. Dies führte zu einer Umschichtung in französische Schuldtitel. Die kurzfristigen Zinssätze der Eurozone sind volatil: In Deutschland schwankten sie während des gesamten Quartals. Im Dezember stabilisierten sie sich bei 2,09 %. Französische Zinssätze beendeten das Quartal hingegen mit 2,28 %. Diese Bewegungen spiegeln die Anpassungen wieder an die wirtschaftlichen Divergenzen zwischen den Mitgliedstaaten und der expansiven Politik der EZB.

Aktienmärkte: unterschiedliche weltweite Entwicklungen

In den USA erreichten die Aktienindizes neue Höchststände. Angetrieben wurden sie von der Erwartung einer für amerikanische Unternehmen günstigen Steuerpolitik und Deregulierung sowie von der Entwicklung der Technologiewerte. Der S&P 500 überschritt die 6.000-Punkte-Marke, viel dann aber wieder zurück, und verzeichnete im Quartal in USD einen Zuwachs von 3,03 %. Mega Caps stiegen um mehr als 14 % und sorgten für einen starken Marktanstieg. Der Nasdaq, der vor allem von den großen Tech- und KI-Unternehmen abhängt, schnitt besser ab und stieg um 6,27 % (in USD). Der Sieg der Republikaner bei den Wahlen führte zu erheblichen internationalen Zuflüssen in US-Aktien. Die Wertentwicklungen zeigen: der „Trump Trade“ geht weiter, das Vertrauen in die amerikanische Wirtschaft wächst wieder und Wachstumswerte locken Anleger an.

In Europa wurden die Indizes belastet durch politische Unsicherheit und enttäuschende Wirtschaftsdaten. Der Eurostoxx 50 beendete das Quartal mit einem Minus von 1,17 % (in EUR). Es gab deutliche Unterschiede zwischen einzelnen Sektoren, und die europäischen Riesen (die „Granolas“) fielen um 7,6 %. Der CAC 40 beendete das Quartal mit einem Minus von 2,55 %. Zurückzuführen ist dies auf enttäuschende Ergebnisse im Luxusgüter- und Automobilssektor sowie auf einen Abschlagen wegen der politischen Unsicherheit. Der deutsche DAX, der stärker von Technologie- und Finanzwerten abhängt, legte eine bemerkenswerte positive Wertentwicklung von 3,8 % an den Tag.

In Asien fiel der Nikkei 225 im vierten Quartal um 5,6 % (in USD). Zurückzuführen ist dies auf die Volatilität des Yen und die Unberechenbarkeit der Entscheidungen der Bank of Japan. Nach der Ankündigung bedeutender Maßnahmen zur Stabilisierung des Immobiliensektors begann Ende September ein Aufschwung chinesischer Aktien. Er setzte sich bis Anfang Oktober fort und flaute dann ab. Die Anleger warten nun auf konkrete Maßnahmen. Der Aufschwung zeigt jedoch: Nach mehreren rückläufigen Quartalen ist das Vertrauen darin zurückgekehrt, dass Peking seine Wirtschaft stabilisieren kann.

Aussichten für 2025

Der Jahresbeginn 2025 wird geprägt sein von Donald Trumps ersten politischen Maßnahmen. Dies könnte sehr unterschiedliche wirtschaftliche Folgen haben. Es hängt davon ab, ob er sich vorrangig um Fiskalpolitik (massive Steuersenkungen) und die Deregulierung bestimmter Sektoren kümmert, oder um stärker protektionistische Maßnahmen und Einwanderungspolitik. Die Zentralbanken, insbesondere die Fed, werden vor diesem Hintergrund vorsichtig bleiben und Anleger werden mit unsicheren Wirtschaftsaussichten und einer erhöhten Volatilität an den Finanzmärkten zu kämpfen haben.

Die Zahlen in diesem Bericht beziehen sich auf die Vergangenheit und lassen nicht unbedingt auf die zukünftige Wertentwicklung schließen.

■ **Erstes Quartal 2025**

Die US-Wirtschaft zeigte im ersten Quartal 2025 Anzeichen von Schwäche, während die Fed angesichts wiederkehrenden Inflationsdrucks die Zinsen unverändert ließ. Europa profitierte hiervon, denn die EZB senkte ihre Leitzinsen weiter und die Regierungen koordinierten gleichzeitig ihre Konjunkturmaßnahmen. Auch China kündigte einen Plan zur Ankurbelung des Konsums an. Die Finanzmärkte sind verunsichert durch Donald Trumps Amtsantritt und seine mitunter widersprüchlichen Entscheidungen. Nachdem die US-Aktienindizes Rekorde gebrochen hatten, konsolidierten sie sich und entwickelten sich schlechter als Europa und China. Langfristige Zinsen entwickelten sich stark in der Eurozone und blieben stabil in den Vereinigten Staaten.

USA

Nach einer fast euphorischen Phase nach der Wahl von Donald Trump hat die US-Wirtschaft ihr positives Wachstumstempo beibehalten. Sie zeigt jedoch mittlerweile deutliche Anzeichen von Schwäche, verursacht durch eine Flut von teilweise widersprüchlichen Entscheidungen der neuen Regierung. Der März markierte einen Wendepunkt: Das Verbrauchervertrauen ging zurück, die Löhne stabilisierten sich und die Inflationserwartungen stiegen stark an. Obwohl wir zum Ende des Quartals im Fertigungssektor eine leichte Verbesserung der Aussichten beobachten konnten, zeigen Wirtschaftswachstumsindikatoren wie der ISM- und S&P-Einkaufsmanagerindex ein uneinheitliches Bild. Der von Washington ausgelöste Handelskrieg beeinträchtigt allerdings die Prognosefähigkeit von Unternehmen. Die Arbeitslosenquote blieb mit 4,1 % stabil. Die Lohnsteigerungen haben sich jedoch verlangsamt. Dies ist zurückzuführen auf einen Personalabbau im öffentlichen Dienst des Bundes sowie die Ausweisung von Millionen illegaler Arbeitskräfte. Dadurch bleibt der Druck auf gering qualifizierte Arbeitsplätze bestehen. Aufgrund der unsicheren Lage zögert die Fed und beschließt, die Leitzinsen unverändert zu lassen, was bei Präsident Trump für Missfallen sorgt. Angesichts der Volatilität am Anleihemarkt hat sie jedoch das Tempo des Abbaus ihrer Bilanz verkürzt. Die Ende März veröffentlichte Kerninflationsrate der persönlichen Konsumausgaben (PCE), die bevorzugte Orientierungsgröße der Fed, übertraf mit 2,8 % auf Jahresbasis die Erwartungen. Dies dürfte die Fed davon abhalten, die Zinsen im April zu senken. In der zweiten Jahreshälfte 2025 rechnen die Märkte mit zwei bis drei Zinssenkungen.

Europa

Die europäische Wirtschaft steht vor großen Herausforderungen: Im ersten Quartal gab es in mehreren Ländern Anzeichen für einen Abschwung und das Wachstum war schwach. Der HCOB-Einkaufsmanagerindex deutet zwar weiterhin auf eine Kontraktion im verarbeitenden Gewerbe hin. Die Aussichten haben sich jedoch in Deutschland, wo die Industrie seit der Pandemie stagniert, deutlich verbessert.

Angesichts der protektionistischen Maßnahmen der USA und der Gefahr, dass diese ihre militärische Unterstützung für die Ukraine zurückziehen könnten, haben die europäischen Staats- und Regierungschefs ihren Zusammenhalt bewahrt. In einer historischen Entwicklung wurden nur wenige Tage nach den Bundestagswahlen am 23. Februar die Beschränkungen für öffentliche Ausgaben aufgehoben. Der designierte Kanzler Merz (CDU) startete mit Unterstützung einer Koalition aus SPD und Grünen ein umfangreiches Konjunkturprogramm. Von den angekündigten Investitionen in Höhe von 500 Milliarden Euro in Infrastruktur fließen 100 Milliarden Euro in den Verteidigungsbereich. Dies stellt eine radikale Veränderung dar. Das Wachstumspotenzial Deutschlands und damit auch das der Eurozone dürfte durch diesen beispiellosen Haushaltscoup gestärkt werden. Diejenigen Ökonomen, die im Januar ihre Prognosen nach unten korrigiert hatten, haben diese im März wieder angehoben.

Die Inflation in der Eurozone schien ihren Abwärtstrend wieder aufgenommen zu haben: Der harmonisierte Preisindex fiel im Februar (die Daten wurden im März veröffentlicht) auf 2,3 % (2,4 % im Januar). Dienstleistungen sind mit 3,7 % weiterhin der größte Inflationsfaktor, während der Energiesektor mittlerweile eine geringere Rolle spielt. Die Kerninflation liegt derzeit bei 2,4 % und dürfte bis zum Jahresende 2 % erreichen.

Angesichts des rückläufigen Inflationstrends und trotz der Risiken im Zusammenhang mit dem Handelskrieg mit den USA senkte die Europäische Zentralbank (EZB) im Laufe des Quartals ihre Zinsen um 50 Basispunkte. Der Einlagensatz fiel vor dem Hintergrund einer Konjunkturabschwächung in der Eurozone von 3 % auf 2,5 %. Gleichzeitig warnte die EZB, dass sie die Entwicklung der Inflation weiterhin aufmerksam beobachten werde.

Die Bank of England (BoE) senkte ihre Zinssätze um 25 Basispunkte auf 4,5 %. Dieser Schritt folgt auf Abwärtskorrekturen der Wachstumsprognosen: Die BoE hat ihre Prognose für 2025 von 1,5 % auf 0,75 % gesenkt.

Asien

Die japanische Wirtschaft zeigte weiterhin ermutigende Anzeichen: Der Konsum stieg, die Exporte waren dynamisch (vor den US-Zöllen) und die Inflation stabilisierte sich trotz eines rückläufigen Index. Die Bank of Japan hat ihre Leitzinsen zwar unverändert gelassen, die Normalisierung ist aber noch nicht abgeschlossen.

Die wirtschaftlichen Aussichten in China haben sich weiter verschlechtert. Die jüngsten Daten der Einkaufsmanagerindizes, die im Vergleich zu Dezember rückläufig sind, deuten auf eine weitere Abschwächung der Wirtschaft hin. Als Reaktion darauf erarbeitete der Nationale Volkskongress Pläne zur Stützung der Wirtschaft durch höhere Haushaltsausgaben, geldpolitische Unterstützung sowie die Zuweisung zusätzlicher Mittel für die Binnennachfrage. Diese Entscheidungen gingen einher mit einer Aufwärtskorrektur der Wachstumsprognosen für 2025 und 2026. Dennoch dürfte die chinesische Zentralbank aufgrund des schwachen Konsums und der negativen Auswirkungen der US-Zölle im zweiten Quartal zum Handeln veranlasst werden, um eine Konjunkturabkühlung zu verhindern.

Die Reduzierung der öffentlichen Ausgaben hat die Wachstumsaussichten in Indien leicht gedämpft. Mit 3,6 % war die Inflation im Februar niedriger als erwartet und verlangsamt sich damit gegenüber den 4,3 % im Januar. Dieser Rückgang ist hauptsächlich zurückzuführen auf einen starken Rückgang der Lebensmittelpreise. Die Reserve Bank of India könnte die Zinsen früher als erwartet senken – möglicherweise bereits im April.

Aktien

Der MSCI ACWI fiel im Laufe des Quartals um 2 % (in USD). Die Ende 2024 einsetzende Wechsel hin zu Europa (MSCI Europe +10 %) und China (MSCI China +14,5 %) setzte sich zu Beginn dieses Jahres fort, während sich die großen US-Aktien konsolidierten (MSCI USA -5 %).

Nachdem der S&P 500 am 19. Februar mit 6.144 Punkten ein neues Hoch erreicht hatte, schloss er das Quartal mit einem Minus von 4,6 % ab. Der Nasdaq 100 gab um 8 % nach. Europäische Aktien verzeichneten hingegen eine positive Wertentwicklung. Der Euro Stoxx 50 stieg um 7,2 % und in Deutschland legte der DAX 30 mit einem Plus von 11,3 % deutlich zu. Ebenso positiv entwickelten sich die Schwellenländer (MSCI EM +2 %), angeführt von China.

Mehrere Faktoren sind dafür verantwortlich, dass sich US-Aktien schlechter entwickelten: (1) die Werte der "Magnificent Seven" sind eingebrochen. Im Laufe des Quartals haben sie fast 16 % verloren. (2) die unterschiedlichen Kurse der Fed und der EZB sowie (3) die Konjunkturprogramme in Deutschland und China, welche die Gewinnerwartungen kurz- und mittelfristig befügelten. Schließlich könnte die Aussicht auf einen Waffenstillstand in der Ukraine die Risikoprämie für europäische Vermögenswerte senken und zu einer Neupositionierung der Märkte führen.

Die Flut von teilweise widersprüchlichen Ankündigungen Donald Trumps sorgte darüber hinaus für erhöhte Volatilität und trieb den VIX um 22 Prozent (+5 Punkte) nach oben. Angesichts der neuen Handelszölle haben Investoren ihre Prognosen revidiert. Dies führte zu einem Rückgang im Automobilssektor, insbesondere in Japan und Korea (Nikkei minus 11 %). Als Reaktion auf das Risiko eines Rückzugs der USA aus der Ukraine wurden massive Investitionen in die Wiederaufrüstung Europas getätigt. Insbesondere der Plan „ReArm Europe“ in Höhe von 800 Milliarden Euro hat den Verteidigungssektor gestützt.

Anleihen

Das erste Quartal war geprägt von einer hohen Volatilität der Zinssätze. Während die langfristigen Zinsen in der Eurozone im März stiegen, gingen die Renditen in den USA insgesamt zurück. Derzeit beobachten wir eine Annäherung der langfristigen Zinssätze.

Die Renditen für zweijährige und zehnjährige US-Staatsanleihen, die Ende 2024 stark gestiegen waren, fielen um jeweils 36 Basispunkte und schlossen bei 3,8 % bzw. 4,2 %. Grund hierfür ist, dass die Anleger nun mit einem Rückgang des Wachstums rechnen.

Nach der Ankündigung einer Erhöhung des deutschen Haushaltsdefizits sowie der Erwartung steigender Anleiheemissionen hat sich der Abwärtstrend der Zinssätze in der Eurozone umgekehrt. Die Renditen zehnjähriger Bundesanleihen stiegen um mehr als 37 Basispunkte. Angesichts der erwarteten Leitzinssenkungen der EZB blieb das kurze Ende jedoch bei 2 % verankert. In der Eurozone sind die Kurven daher steiler geworden. Die Spreads bleiben stabil. Der Spread zwischen französischen OAT-Anleihen und 10-jährigen deutschen Bundesanleihen verringerte sich allerdings um 11 Basispunkte.

Anfangs erwiesen sich Kredite in dieser Phase volatiler Staatsanleihezinsen als widerstandsfähig. Dann begannen die Spreads jedoch, sich zu erweitern – insbesondere bei US-Hochzinsanleihen –, während die Aktienkurse fielen und die Volatilität zunahm.

Devisen, Gold und Erdöl

Im Zusammenhang mit Zinsbewegungen entwickelt sich der Devisenmarkt volatil. Die Aussicht auf eine Divergenz zwischen der Fed und der EZB stärkte zunächst den Dollar (EUR/USD 1,02), bevor der starke Anstieg der deutschen Langfristzinsen den Euro wieder auf 1,08 gegenüber dem Dollar brachte.

Gold profitierte von der geopolitischen Lage und dem Wertverlust des Dollar. Der Goldpreis stieg um 19 Prozent und erreichte mit 3.124 Dollar pro Unze einen historischen Höchststand.

Die Ölpreise fielen um 5 %, da mit einer erhöhten Produktion seitens der OPEC und der USA sowie einer Beendigung der Kämpfe im Nahen Osten gerechnet wurde. Aufgrund neuer Sanktionen gegen Russland stiegen die Ölpreise jedoch wieder an.

Die Zahlen in diesem Bericht beziehen sich auf die Vergangenheit und lassen nicht unbedingt auf die zukünftige Wertentwicklung schließen.

■ **Zweites Quartal 2025**

Das Quartal war geprägt vom Handelskrieg der USA. Dies trübte die Wachstumsaussichten und verstärkte die Befürchtungen, dass die Inflation wieder um sich greifen könnte. Während die EZB eine Senkung der Leitzinsen verfolgte, nahm die Fed eine abwartende Haltung ein. Die Reaktion Chinas und die Kehrtwende Washingtons schürten die Unsicherheit an den Finanzmärkten. Dies schlug sich nieder in einem deutlichen Rückgang des Dollars und der Aktienkurse sowie in einem starken Druck auf die langfristigen Zinsen. Militäroperationen zwischen Israel/den USA und dem Iran führten zu erheblichen Ölpreisschwankungen. Trotz dieser Turbulenzen erwiesen sich die Märkte als widerstandsfähig und behaupteten sich im Allgemeinen gut.

Gesamtwirtschaftliche Entwicklung

USA

Die Ankündigung von Donald Trump vom 2. April, für die meisten Handelspartner der USA äußerst kostspielige Zölle einzuführen, war für Unternehmen, Verbraucher und Investoren ein Schock. Nach dem Einbruch der Märkte und des Dollars trug die Aussetzung dieser Entscheidung für 90 Tage ab dem 9. April dazu bei, die Spannungen abzubauen. Allerdings wurden die Wachstumsaussichten für die US-Wirtschaft nach unten korrigiert. Die Veröffentlichung der Wachstumszahlen für das erste Quartal bestätigte den Rückgang mit einem Minus von 5 %. Die US-Notenbank prognostiziert für das Jahr 2025 nun ein Wachstum von 1,4 %. Der IWF prognostiziert 1,8 %, die Weltbank 1,4 %. Dies lässt auf erhebliche Unsicherheit unter den Ökonomen schließen. Derzeit wird mit dem Kongress über den neuen Haushalt, den sogenannten „Big Beautiful Bill“, verhandelt. Dieser soll Steuersenkungen in Höhe von 4,5 Billionen Dollar vorsehen und die Staatsverschuldung um 3,3 Billionen Dollar erhöhen.

Der Konsum der privaten Haushalte bleibt dank des nach wie vor robusten Arbeitsmarkts zwar stabil, zeigt jedoch Anzeichen einer Abschwächung. Die Schaffung neuer Arbeitsplätze verlangsamt sich, die Arbeitslosenquote bleibt jedoch stabil bei 4,2 %. Fortgeschrittene Indikatoren bestätigen dennoch eine Verschlechterung der Aussichten, wie etwa der ISM¹ für das verarbeitende Gewerbe, der stabil bei 48,5 liegt, und der ISM für das nicht-verarbeitende Gewerbe, der rückläufig bei 49,5 liegt. Die Konjunkturdaten zeigen am Ende des Quartals einen Rückgang des Konsums und der Industrieproduktion. Im Mai gingen die Einzelhandelsumsätze in den USA im Vergleich zum April um 0,9 % zurück. Die Industrieproduktion stagnierte im Mai nahezu, und die Neubautätigkeit ist rückläufig.

Die Inflationsmaßnahmen sendeten gemischte Signale. Mit 2,4 % lag der Kernindex der Verbraucherpreise für Mai unter den Erwartungen (erwartet wurden 2,5 %). Die Inflationsrate der persönlichen Konsumausgaben (PCE), der von der Fed bevorzugte Maßstab, scheint jedoch wieder anzusteigen. Die PCE-Kerninflation stieg auf Jahresbasis um 2,7 %. Die Konsensprognose lag bei 2,6 %. Vor diesem Hintergrund entschied die Fed, abzuwarten und die Leitzinsen trotz des starken Drucks seitens des Weißen Hauses unverändert zwischen 4,25 % und 4,50 % zu belassen.

Europa

Das beschleunigte Wachstum Europas scheint durch den amerikanischen Handelskrieg gebremst zu werden – trotz der beispiellosen Erhöhung der öffentlichen Ausgaben in Deutschland. Mit 1,5 % lag das Wachstum in der Eurozone im ersten Quartal auf Jahresbasis über den Erwartungen. Die Europäische Zentralbank (EZB) korrigierte ihre Prognosen für das Wirtschaftswachstum in Europa für das Jahr 2025 nach oben. Sie erwartet nun ein Wachstum von 0,9 %. Die Stärke des Arbeitsmarktes mit einer historisch niedrigen Arbeitslosenquote von 6,3 % dürfte den Konsum ankurbeln und das Wachstum stützen. Umfragen zufolge zeigt sich die Eurozone nach dem Rückgang im April widerstandsfähig. Im Fertigungssektor stabilisierten sich die Aussichten. So erreichte die Einkaufsmanager-Umfrage PMI2 von HCOB im Juni einen Wert von 50,2 gegenüber 49,4 im Mai. Dies deutet auf eine leichte Verbesserung der Auftragslage im Fertigungssektor hin. In Deutschland stieg der ZEW-Index im Juni stark an. Er kletterte gegenüber dem Vormonat um 22,3 Punkte auf 47,5. Dies deutet auf eine Verbesserung der Erwartungen hin. Der ifo-Geschäftsklimaindex bestätigte dies. Während sich die Aussichten in Deutschland verbessern, sehen wir Schwächen in Frankreich. Die vierteljährliche Umfrage der Banque de France bestätigte diese Verschlechterung der Aussichten für Frankreich.

Die neue deutsche Regierung verabschiedete einen Haushaltentwurf für 2025 sowie ehrgeizige mittelfristige Haushaltspläne. Die Maßnahmen konzentrieren sich auf Steuererleichterungen für Unternehmen sowie auf die Unterstützung der Energiepreise für Haushalte und Unternehmen. Damit soll das Vertrauen gestärkt und das Wachstumspotenzial der Wirtschaft verbessert werden. 2025 wird das Haushaltsdefizit voraussichtlich 3,2 % des BIP erreichen.

Die Daten für Mai bestätigten den Rückgang der Inflation in der Eurozone. Sie weisen einen Anstieg von lediglich 1,9 % aus, wobei der Dienstleistungssektor den größten Beitrag leistete. Die EZB hat ihre Inflationsprognose für 2026 von 1,9 % auf 1,6 % und für 2027 von 2,1 % auf 2,0 % nach unten korrigiert. Zudem senkte sie ihren Einlagensatz im Laufe des Quartals um 50 Basispunkte.

Im Vereinigten Königreich behielt die Bank of England (BoE) den Status quo bei und ließ ihren Leitzins unverändert bei 4,25 %. Dennoch könnten rückläufige Immobilienpreise in Verbindung mit dem schwachen Verbrauchervertrauen die BoE dazu veranlassen, ihre Zinsen im dritten Quartal zu senken.

Asien

Japan verzeichnete im ersten Quartal einen Rückgang des BIP, und auch im Mai zeigte sich eine schwache Entwicklung. Im Vergleich zum Vorquartal sank das BIP um 0,2 %. Grund hierfür sind die schwachen Exporte. Diese Zahl spiegelt die Auswirkungen der US-Handelszölle noch nicht vollständig wider. Die Kerninflation beschleunigte sich im April auf 3,5 Prozent im Jahresvergleich (im März waren es noch 3,2 Prozent). Aufgrund des schwachen Wachstums ist jedoch nur mit einer sehr allmählichen Erholung zu rechnen. Aufgrund der Konjunkturabschwächung und der Inflation in Japan behielt die Bank of Japan (BoJ) ihren Leitzins bei 0,5 % unverändert bei. Eine bevorstehende Zinserhöhung wurde nicht angekündigt. Eventuell wird es sie im Januar 2026 geben, wenn sich die zyklische Erholung bestätigt. Die BoJ hat außerdem beschlossen, ihre Bilanzsumme langsamer zu reduzieren. So soll die Volatilität der langfristigen Zinsen begrenzt werden. Schließlich kündigte der Finanzminister an, die Emission von Anleihen mit sehr langen Laufzeiten zu reduzieren, um den Druck auf 30-jährige Anleihen zu verringern.

Der Handelskrieg mit den USA beeinträchtigte die wirtschaftlichen Aussichten in China. Mit 48,9 lag der Anfang Juni veröffentlichte Caixin-Index für das verarbeitende Gewerbe unter den Erwartungen und deutet auf eine weitere Verschlechterung hin. Ein nur geringfügiges Wachstum ist im Dienstleistungssektor zu verzeichnen. Der anhaltende Rückgang der Immobilienpreise veranlasste die Behörden dazu, den Markt weiter zu stützen. Die offizielle Arbeitslosenquote liegt stabil bei 5,1 % und die Einzelhandelsumsätze stiegen um 6,4 %. Dennoch wurde eine Deflation bestätigt. Die Erzeugerpreise fielen um 3,3 % und auch die Verbraucherpreise gingen im Mai um 0,1 % zurück. Vor dem Hintergrund des unsicheren Handels kehrte die chinesische Zentralbank (PBoC) zurück zu ihrer geldpolitischen Lockerung und senkte den 1-Jahres-Zinssatz auf 3 % sowie den 5-Jahres-Zinssatz auf 3,5 %. Der Handelsüberschuss blieb im Mai mit 750 Milliarden Yuan weitgehend unverändert. Das Land hat sich zwei Ziele gesetzt: Einerseits soll die Arbeitslosigkeit in den Städten bei etwa 5 bis 5,5 % gehalten werden, andererseits sollen bis Ende des Jahres 12 Millionen Arbeitsplätze geschaffen werden.

In Indien bleiben die wirtschaftlichen Aussichten solide. Der Composite-Einkaufsmanagerindex von HSBC für Juni lag mit 61 über den Erwartungen von 59,4. Die Inflation ist weiter rückläufig und erreichte den niedrigsten Stand seit sechs Jahren. Im Mai lag sie bei 2,8 % im Vergleich zum Vorjahr, gegenüber 3,2 % im April. Dies ist auf den Rückgang der Lebensmittelpreise zurückzuführen. Auch die Kerninflation ist rückläufig. Dieses Umfeld ermöglichte es der Reserve Bank of India (RBI), ihren Leitzins um 50 Basispunkte zu senken. Anfang August findet die nächste Sitzung statt. Dort wird voraussichtlich eine Pause in der Geldpolitik angekündigt.

Finanzmärkte

Aktien

Nach der Ankündigung von Zöllen und deren anschließender Verschiebung waren die Aktienmärkte Anfang April extremen Schwankungen ausgesetzt. Im Laufe des Quartals entwickelten sie sich jedoch positiv. Im Mai entwickelten sich die US-Märkte besser als Europa und Asien, angetrieben von den guten Ergebnissen der „Magnificent Seven“. Dieser Trend bestätigte sich im Juni, als die US-amerikanischen Indizes historische Höchststände erreichten. Bis Ende März legte der S&P 500 um 10,6 % zu, der Nasdaq 100 stieg um 17,6 %. Der Eurostoxx 50 in der Eurozone stieg dagegen nur um 1 %, angetrieben vom DAX 30 (plus 7,9 %), aber gebremst vom CAC 40 (minus 1,6 %). Bei den Währungen legte der Euro in diesem Quartal erneut zu, und zwar um 9 % gegenüber dem Dollar. Damit stieg er seit Jahresbeginn um 13 %. Die Marktperformance der USA, gemessen in Euro, war daher eher mittelmäßig. Nachdem der Volatilitätsindex VIX im April um über 50 % gestiegen war, fiel er zum Ende des Berichtszeitraums wieder auf unter 17 %. Man ist scheinbar also wieder etwas optimistischer. Die Schwellenländer verzeichneten einen Zuwachs von 11,5 % in Dollar. In Asien ist der Trend insgesamt positiv, vor allem in Korea und Taiwan. Der chinesische Markt blieb volatil und beendete das Quartal aufgrund fehlender fiskalischer Impulse mit einem durchschnittlichen Minus von 2 Prozent in US-Dollar.

¹Ein ISM-Index, der über 50 % liegt, ist ein Indikator für eine Ausweitung der Produktion im Vergleich zum Vormonat. Ein ISM-Index, der unter 50 % liegt, deutet auf einen Rückgang der Produktionstätigkeit im Vergleich zum Vormonat hin.
²Der HCOB PMI® Germany Services Activity Index basiert auf einer einzigen Frage: dem Vergleich des Aktivitätsniveaus mit dem des Vormonats. Ein Indexwert unter 50,0 zeigt eine Kontraktion an, und je niedriger der Wert, desto schneller der Rückgang.

Die Zahlen in diesem Bericht beziehen sich auf die Vergangenheit und lassen nicht unbedingt auf die zukünftige Wertentwicklung schließen.

Anleihen

Im zweiten Quartal kam es zu einem Rückgang der kurzfristigen Zinsen und einer starken Volatilität der langfristigen US-Zinsen. Die Entwicklung der kurzfristigen Zinsen hängt zusammen mit den Erwartungen hinsichtlich Zinssenkungen durch die Fed und die EZB, einem Rückgang der Inflation sowie den Aussichten auf eine Verlangsamung des globalen Wachstums. Die Volatilität von Anleihen bleibt hoch, insbesondere bei US-Staatsanleihen. (Geo-)politische und haushaltspolitische Unsicherheiten verstärken dies. Ende Juni lag der 10-Jahres-Zinssatz in den USA bei rund 4,23 %, nachdem er zuvor auf 4,6 % gestiegen war. Der 2-Jahres-Zinssatz stand am Ende bei 3,72 %. Die Anleger rechnen in der zweiten Jahreshälfte mit einer geldpolitischen Lockerung und einer Verlangsamung des nominalen Wachstums in den USA. In der Eurozone erreichte die Rendite zehnjähriger deutscher Bundesanleihen 2,61 %, während die Rendite zweijähriger Anleihen gegenüber dem Jahresende um 22 Basispunkte (und gegenüber Ende März um 19 Basispunkte) auf 1,86 % fiel. Dies geschieht, während die EZB ihren Zinssenkungszyklus fortsetzt und ihren Einlagenszinssatz erneut auf 2 % senkt. Mit Ausnahme Italiens, wo sie um 26 Basispunkte sanken, bleiben die Spreads der Staatsanleihen in der Eurozone stabil. Insbesondere Unternehmensanleihen mit hohen Renditen konnten ihre positive Wertentwicklung fortsetzen.

Devisen und Rohstoffe

Der Euro legte gegenüber dem Dollar um 9 Prozent zu. Damit entwickelte er sich zu einer potenziellen globalen Alternative zum Dollar. Im Laufe des Quartals stieg er von 1,08 auf 1,18. Das britische Pfund legt gegenüber dem US-Dollar ebenfalls weiter zu und ist seit Ende März um fast 6,5 % gestiegen. Während der Yuan gegenüber dem Dollar stabil bei etwa 7,2 bleibt, hat der Yen gegenüber dem Dollar leicht an Wert gewonnen.

Gold bestätigte im April und Mai seinen Status als sicherer Hafen, brach Rekorde und erreichte einen Preis von 3.450 Dollar pro Unze. Ende Juni stabilisierte es sich bei 3.303 Dollar pro Unze. Seit Jahresbeginn ist Gold um 25,9 % gestiegen.

Der Preis für ein Barrel Erdöl war in diesem Zeitraum sehr volatil. Grund dafür war der Krieg zwischen Israel/den USA und dem Iran. Aufgrund der sich verschlechternden Wirtschaftsaussichten und vor allem aufgrund einer Erhöhung der Förderquoten der OPEC, insbesondere Saudi-Aubiens, ist der Ölpreis im Laufe des Quartals jedoch deutlich gefallen. Ein Barrel Brent verlor im Laufe des Quartals 10 Dollar (minus 9,5 %) und schloss bei rund 68 Dollar. Nachdem es am 5. Mai die symbolische 60-Dollar-Marke erreicht hatte, lag es auf dem niedrigsten Stand seit Februar 2021. Anfang Juni lag der Preis jedoch noch bei 80 Dollar.

Luxemburg, 28. Oktober 2025

1 EINLEITUNG

Amundi Funds (der „Fonds“) ist eine nach dem Recht des Großherzogtums Luxemburg errichtete Investmentgesellschaft mit veränderlichem Kapital („Société d'investissement à capital variable“, kurz SICAV). Der Fonds mit dem ursprünglichen Namen „Groupe Indosuez Funds FCP“, ein Investmentfonds auf Gegenseitigkeit ohne Rechtspersönlichkeit („Fonds Commun de Placement“), wurde gemäß Art. 110 (2) des Gesetzes vom 30. März 1988 zu Organismen für gemeinsame Anlagen am 18. Juli 1985 aufgelegt und am 15. März 1999 in GIF SICAV II umbenannt. Die Umwandlungsurkunde und die Satzung (die „Satzung“) wurden am 28. April 1999 im Mémorial, Recueil des Sociétés et Associations veröffentlicht. Der Name des Fonds wurde am 1. Dezember 1999 in GIF SICAV, am 8. Dezember 2000 in Crédit Agricole Funds und am 1. Juli 2007 in CAAM Funds geändert. Zum 2. März 2010 wurde CAAM Funds gemäß dem Beschluss der Anteilseigner im Rahmen der Außerordentlichen Hauptversammlung vom 23. November 2009 und dem Beschluss des Verwaltungsrats vom 23. Dezember 2009 in Amundi Funds umbenannt.

Der Satzungsänderungen wurden am 14. Januar 2000, am 17. Januar 2001 bzw. am 13. Juni 2007 hinsichtlich der ersten drei Namensänderungen, und am 3. April 2010 für die letzte Änderung im Mémorial, Recueil des Sociétés et Associations veröffentlicht. Eine letzte Änderung der Satzung erfolgte am 14. März 2012 und wurde am 12. April 2012 im Mémorial, Recueil des Sociétés et Associations - C, Nummer 943 veröffentlicht. Der Fonds unterliegt Teil I des Gesetzes vom 17. Dezember 2010 zu OGA (das „Gesetz von 2010“).

Im Laufe des Jahres wurden folgende Teilfonds aufgelegt:

Amundi Funds China New Energy am 24. September 2024
Amundi Funds India Equity Contra am 25. Februar 2025

Die folgenden Teilfonds wurden am 12. September 2024 umbenannt:

Amundi Funds Euro Government Bond in Amundi Funds Euro Government Bond Responsible
Amundi Funds Euro Corporate Short Term Impact Green Bond in Amundi Funds Impact Euro Corporate Short Term Green Bond
Amundi Funds Absolute Return Credit in Amundi Funds Multi Sector Credit

Die folgenden Teilfonds wurden am 28. April 2025 umbenannt:

Die folgenden Teilfonds wurden am 16. Mai 2025 umbenannt:

Amundi Funds Target Coupon in Amundi Funds Euro Bond Income und wurde aus seinem Dachfonds Amundi Revenus herausgelöst.

Die folgenden Teilfonds wurden im Laufe des Jahres liquidiert:

Amundi Funds Global Macro Bonds & Currencies Low Vol am 22. Juli 2024
Amundi Funds Climate Transition Global Equity am 6. Dezember 2024

Zum 30. Juni 2025 bestehen laut Bestätigung der Depotstelle bei den liquidierten Teilfonds – einschließlich jener, die in den Vorjahren liquidiert wurden – folgende Salden:

- Amundi Funds Equity Korea: USD 11,814.03 und EUR -1,200.00
- Amundi Funds Equity Emerging Conservative : USD 20,349.81
- Amundi Funds Global Macro Bonds & Currencies : EUR 35,834.65
- Amundi Funds Climate Transition Global Equity : EUR 2,724.61 and USD 45.86
- Amundi Funds Global Macro Bonds & Currencies Low Vol : EUR 6,300.83

Ziel von Amundi Funds Protect 90 ist es, eine Partizipation an der Entwicklung der Finanzmärkte zu ermöglichen und gleichzeitig einen dauerhaften teilweisen Schutz Ihrer Investition über jeden beliebigen Zeitraum von drei Jahren zu bieten. Konkret ist der Teilfonds so konzipiert, dass sein Anteilspreis 90 % des höchsten Nettoinventarwerts seit dem letzten Geschäftstag des vorhergehenden Monats April gemäß dem Prospekt nicht unterschreitet.

In Anbetracht des entsprechenden kumulierten Anteils russischer und ukrainischer Wertpapiere im Portfolio und nach einem Beschluss des Verwaltungsrats der SICAV:
- Amundi Funds Russian Equity: wurde die Berechnung des NIW am 28. Februar 2022 ausgesetzt und der letzte verfügbare offizielle NIW ist datiert auf den 25. Februar 2022.

Nach diesem Datum wurden bei diesem Teilfonds keine weiteren Zeichnungen oder Rücknahmen angenommen.

- Amundi Funds Emerging Europe Middle East and Africa: die am 11. April 2023 geschaffene getrennte Klasse (ISIN LU2600584523), in die alle illiquiden russischen Vermögenswerte und Verbindlichkeiten übertragen wurden, besteht weiterhin.

Die Klasse wird immer noch abgewickelt und es werden weiterhin keine Zeichnungen und Rücknahmen angenommen. Die Verwaltungsgesellschaft verzichtet nach wie vor auf alle damit verbundenen Gebühren oder übernimmt diese. Für Anteilinhaber wurden keine Vorschüsse auf den Liquidationserlös vorweggenommen.

In Bezug auf den Prospekt vom Mai 2025 bestand der Fonds aus 114 aktiven Teilfonds, die jeweils in einen bestimmten Markt oder eine Gruppe von Märkten investieren. Equity Japan Target, Euroland Equity, Europe Equity Select, Euroland Equity Small Cap Select, Europe ex UK Equity, European Equity, Europe Equity Green Technology, European Equity Value, Europe Equity Income Select, European Equity Small Cap, Global Equity Responsible, Global Equity, Global Equity Select, Global Equity Income Select, Japan Equity Select, Japan Equity Value, Montpensier Great European Models SRI, Montpensier M Climate Solutions, Global Equity Climate, Europe Equity Climate, Polen Capital Global Growth, US Equity Dividend Growth, US Equity Select, US Equity Fundamental Growth, US Equity Research, US Equity Research Value, US Pioneer Fund, China New Energy, Asia Equity Focus, China A Shares, China Equity, Emerging Europe Middle East and Africa, Emerging Markets Equity Select, Emerging Markets Equity Focus, Emerging Markets Equity Focus ex China, Emerging World Equity, Equity MENA, Latin America Equity, Emerging Markets Equity Climate, Emerging Markets Equity Growth Opportunities, Russian Equity, SBI FM India Equity, India Equity Contra, Euroland Equity Dynamic Multi Factors, Euroland Equity Risk Parity, European Equity Conservative, European Equity Dynamic Multi Factors, Global Equity Conservative, Global Equity Dynamic Multi Factors, European Convertible Bond, Montpensier Global Convertible Bond, Euro Aggregate Bond, Euro Corporate Bond Select, Euro Government Bond Responsible, Euro Inflation Bond, Impact Euro Corporate Short Term Green Bond, Strategic Bond, Euro High Yield Bond, Euro High Yield Short Term Bond, Euro Subordinated Bond Responsible, Global High Yield Bond Responsible, Global Subordinated Bond, Pioneer Global High Yield Bond, US High Yield Bond, Global Aggregate Bond, Global Government Bond, Global Corporate Bond, Global Corporate Bond Select, Global High Yield Bond, Global Inflation Short Duration Bond, Global Short Term Bond, Global Bond Flexible, Impact Green Bond, Multi Sector Credit, Global Corporate Bond Climate, Optimal Yield, Optimal Yield Short Term, Strategic Income, US Corporate Bond Climate, US Bond, US Corporate Bond Select, US Short Term Bond, Asia Bond Income Responsible, China RMB Aggregate Bond, Emerging Markets Blended Bond, Emerging Markets Bond, Emerging Markets Corporate Bond, Emerging Markets Corporate High Yield Bond, Emerging Markets Green Bond, Emerging Markets Hard Currency Bond, Emerging Markets Local Currency Bond, Emerging Markets Short Term Bond, Asia Multi-Asset Target Income, Euro Multi-Asset Target Income, Global Multi-Asset, Global Multi-Asset Conservative, Global Multi-Asset Target Income, Income Opportunities, Multi-Asset Real Return, Multi-Asset Conservative Responsible, Multi-Asset Climate, Pioneer Flexible Opportunities, Real Assets Target Income, Euro Bond Income, Absolute Return Forex, Absolute Return Multi-Strategy, Absolute Return Global Opportunities Bond, Multi-Strategy Growth, Quantitative Global Absolute Return Bond, Volatility Euro, Volatility World, Protect 90, Cash EUR und Cash USD.

Die SICAV kann in jedem Teilfonds Anteilsklassen mit verschiedenen Eigenschaften und Anforderungen für in Frage kommende Anleger auflegen und ausgeben. Jede Anteilsklasse wird identifiziert durch eine (in folgender Tabelle aufgeführte) Basiskennung am Anfang, gefolgt vom jeweiligen Zusatz.

Kennung der Klasse (ab 1. Juni 2019)	Anleger	Genehmigung des Verwaltungsrats erforderlich	Mindest-erstanlage ¹	Maximale Zeichnungs-gebühren ²	Maximale Wechselge-bühren ⁴	Maximale Rücknahme gebühren

Eine vollständige Liste der zurzeit erhältlichen Teilfonds und Anteilsklassen finden Sie auf der Website www.amundi.lu/amundi-funds.

¹ Für die Mindest-erstanlage addieren wir alle Investitionen eines bestimmten Anlegers (oder einer Gruppe von Teilunternehmen in hundertprozentigem Besitz derselben Muttergesellschaft) in der gesamten SICAV (alle Anteilsklassen und alle Teilfonds). Die Mindestbeträge sind in USD oder ein gleichwertiger Betrag in einer anderen Währungen.

² Kann bei Volatility Euro und Volatility World bis zu 2.00% höher sein, wenn der Verwaltungsrat entscheidet, dass neue Anlagen die Interessen bestehender Anteilhaber beeinträchtigen können.

³ Bei den Anteilsklassen I2 und A2 ist keine Genehmigung des Verwaltungsrats erforderlich.

⁴ Bei A4-Anteilsklassen ist ein Wechsel nur zwischen A4-Anteilsklassen eines anderen Teilfonds des OGAW möglich.

2 GRUNDSÄTZE DER RECHNUNGSLEGUNG

■ DARSTELLUNG DES GESCHÄFTSBERICHTS

Die Geschäftsberichte des Fonds wurden in Übereinstimmung mit den geltenden Bestimmungen über OGA in Luxemburg erstellt.

Der Abschluss wird auf der Grundlage des letzten während des Geschäftszeitraums berechneten Nettoinventarwerts („NIW“) dargestellt. Die NIW wurden gemäß dem Prospekt vom Juni 2025 unter Verwendung der letzten zum Zeitpunkt der Berechnung bekannten Marktwerte und Wechselkurse berechnet, d. h.:

- Für alle Teilfonds: offizieller NIW vom 30. Juni 2025.

Im Jahresbericht zum 30. Juni 2025 werden die während dieses Jahres zusammengelegten oder aufgelösten Teilfonds in der Ertrags- und Aufwandsrechnung und Änderungen des Nettovermögens separat dargestellt und sind in den konsolidierten Zahlen enthalten.

Der Geschäftsbericht des Fonds und seiner einzelnen Teilfonds wurde nach dem Bilanzierungsgrundsatz der Unternehmensfortführung erstellt.

- **Teilfondsübergreifende Anlagen** - Zum 30. Juni 2025 besitzen die Teilfonds Anlagen anderer Teilfonds der SICAV im Wert von EUR 872.305.258,53. Dies entspricht 1.07 % des gesamten Nettoinventarwerts. Daher beliefe sich der gesamte zusammengefasste NIW ohne diese Anlagen in anderen Teilfonds zum Jahresende auf EUR 80,999,072,304,47.
- **Wertpapierportfolio** - Der Wert der börsennotierten oder auf einem regulierten Markt gehandelten Wertpapiere wird zum letzten bekannten Börsenkurs ermittelt. Falls dieser Kurs nicht repräsentativ ist oder die Wertpapiere nicht börsennotiert sind, wird er zum vorsichtig und in gutem Glauben vom Verwaltungsrat geschätzten Veräußerungswert bewertet.
- **Umrechnung von Posten in Fremdwährungen** - Der Geschäftsbericht des Fonds lautet in Euro (EUR). Daher wird das in anderen Währungen lautende Nettovermögen jedes Teilfonds zu dem am Abschlussstag des Geschäftsjahres gültigen Wechselkurs in EUR umgerechnet und konsolidiert. Aktiengeschäfte und Käufe von Aktien aus Portfolios in anderen Währungen werden in der Währung des Teilfonds zu dem am Tag der Transaktion oder des Erwerbs gültigen Wechselkurs umgerechnet. Der Börsenwert des Wertpapierbestandes sowie die übrigen Vermögenswerte und Verbindlichkeiten in anderen Währungen werden zu dem am Abschlussstag des Geschäftsjahrs gültigen Wechselkurs in die Währung umgerechnet, auf welche der Teilfonds lautet. Währungsdifferenzen aus diesen Umtauschtransaktionen werden in der Aufwands- und Ertragsrechnung für das Nettovermögen in der Rubrik „Neubewertung des konsolidierten Nettovermögens“ festgehalten.
- **Kapitalrendite** - Die Dividenden werden an dem Tag als Ertrag verrechnet, an dem sie erklärt wurden, soweit der Fonds über diesbezügliche Informationen verfügt. Zinsen werden auf Tagesbasis verrechnet.
- **Aufteilung der Kosten und Aufwendungen** - Jeder Teilfonds wird mit den Kosten oder Aufwendungen belastet, die ihm jeweils zuzurechnen sind. Die Kosten und Aufwendungen, die keinem Teilfonds im Besonderen zugerechnet werden können, werden auf angemessene Weise zwischen den Teilfonds entsprechend deren jeweiligem Nettovermögen aufgeteilt.
- **Pensionsgeschäfte** - Pensionsgeschäfte (Repos) entsprechen Geschäften mit Anleihen, die durch Vermögenswerte gedeckt sind. Diese sind im Wertpapierbestand des Teilfonds vertreten, der weiterhin dem Marktrisiko ausgesetzt ist. Reverse Pensionsgeschäfte entsprechen gedeckten Darlehen. In diesem Fall ist der Teilfonds keinem Risiko einer Minderung des Vermögenswertes ausgesetzt. Pensionsgeschäfte und Reverse Pensionsgeschäfte werden als Geschäfte mit Anleihen und Darlehen in Höhe der eingegangenen und/oder ausgezahlten liquiden Mittel betrachtet.
- **Termingeschäfte** - Nicht fällige Termingeschäfte werden zu ihrem letzten, am Bewertungstag oder Stichtag bekannten Kurs bewertet. Die daraus entstandenen, nicht realisierten Gewinne oder Verluste werden in den Veränderungen des Nettovermögens verbucht. Realisierte Nettogewinne/(-verluste) bzw. Veränderungen nicht realisierter Nettogewinne/(-verluste) aus Termingeschäften werden in der Aufwands- und Ertragsrechnung und in den Veränderungen des Nettovermögens verbucht.
- **Termingeschäftartige Optionen** - Termingeschäftartige Optionen werden zum verfügbaren offiziellen Börsenpreis bewertet. Ersteinschusszahlungen werden bei Abschluss des Kontrakts in bar bezahlt. Der Teilfonds zahlt oder erhält regelmäßig nachfolgende positive oder negative Barmittelflüsse, die Schwankungsmargen genannt werden. Sie basieren auf Änderungen des Marktwerts termingeschäftartiger Optionen. Bei Abschluss des Kontrakts verzeichnet der betroffene Teilfonds einen realisierten Gewinn bzw. Verlust in Höhe der Differenz zwischen den Erlösen (bzw. den Kosten) aus dem Abschluss- und dem Eröffnungsgeschäft. Nicht realisierten Nettogewinne oder -verluste aus termingeschäftartigen Optionen werden in der Aufwands- und Ertragsrechnung verbucht. Realisierte Nettogewinne/(-verluste) bzw. Veränderungen nicht realisierter Nettogewinne/(-verluste) aus termingeschäftartigen Optionen werden in der Aufwands- und Ertragsrechnung und in den Veränderungen des Nettovermögens verbucht.
- **Devisentermingeschäfte** - Nicht fällige Devisentermingeschäfte werden zu den am Bewertungstag oder Stichtag gültigen Kursen bewertet. Daraus entstandene, nicht realisierte Gewinne oder Verluste werden in den Veränderungen des Nettovermögens verbucht. Realisierte Nettogewinne/(-verluste) bzw. Veränderungen nicht realisierter Nettogewinne/(-verluste) aus Devisentermingeschäften werden in der Aufwands- und Ertragsrechnung und in den Veränderungen des Nettovermögens verbucht.
- **Bewertung von Optionen und Swaptions** - Für Optionen, die an einer Aktienbörse oder einem anderen regulierten, regelmäßig betriebenen, anerkannten und öffentlichen Markt gehandelt werden, gilt, dass sie mit ihren Schlusskursen am Bewertungstag veranschlagt werden. Außerbörslich gehandelte Optionen werden basierend auf den in den Kontrakten festgeschriebenen Elementen nach dem aktuellen Marktpreis bewertet. Sind die letzten verfügbaren Kurse börsennotierter Optionen oder die ermittelten Kurse außerbörslich gehandelter Optionen nicht repräsentativ, so beruht die Bewertung auf dem möglichen Realisierungswert, den der Verwaltungsrat der SICAV umsichtig und in gutem Glauben schätzt. Realisierte Nettogewinne/(-verluste) bzw. Veränderungen nicht realisierter Nettogewinne/(-verluste) aus außerbörslich gehandelten Optionen und Swaptions werden in der Aufwands- und Ertragsrechnung und den Veränderungen des Nettovermögens verbucht.
- **Swaps** - Der Fonds ist berechtigt, Varianzswaps, Credit Default Swaps, Total Return Swaps, Inflationsswaps, Asset Swaps, Zinsswaps oder Währungsswaps einzugehen. Diese Swaps werden zum Marktwert basierend auf den in den Kontrakten festgeschriebenen Bewertungselementen festgehalten. Der nicht realisierte Nettogewinn ist in der Nettovermögensaufstellung im Posten „Nicht realisierter Nettogewinn aus Swapgeschäften und CFD“ enthalten. Der nicht realisierte Nettoverlust ist in der Nettovermögensaufstellung im Posten „Nicht realisierter Nettoverlust aus Swapgeschäften und CDF“ enthalten. Realisierte Nettogewinne/(-verluste) bzw. Veränderungen nicht realisierter Nettogewinne/(-verluste) aus Swaps werden in der Aufwands- und Ertragsrechnung und in den Veränderungen des Nettovermögens verbucht.
- **Money market instruments** - Der Geldmarkt ist ein Finanzinstrument mit hoher Liquidität und sehr kurzen Laufzeiten. Teilnehmer nutzen ihn für kurzfristige Leihgeschäfte als Leihnehmer und Leihgeber. Die Laufzeiten bewegen sich in der Regel zwischen einem Tag und knapp einem Jahr. Der Wertzuwachs (die Differenz zwischen Kosten und amortisiertem Wert) von Geldmarktinstrumenten des Wertpapierbestands zum Jahresende wird in der Aufwands- und Ertragsrechnung für das Nettovermögen unter „Veränderung des nicht realisierten Nettogewinns / (-verlusts) aus Wertpapieranlagen und Verbindlichkeiten aus reversen Pensionsgeschäften“ ausgewiesen. Sollten die Instrumente verkauft oder rückerstattet worden sein, so wird dieses Ergebnis in der Aufwands- und Ertragsrechnung für das Nettovermögen als „realisierter Nettogewinn/(-verlust) aus verkauften Wertpapieren“ berücksichtigt.
- **Wertpapiere der Kategorie „To Be Announced“ (TBA)** - Der Begriff TBA-Positionen verweist auf die übliche Handelspraxis auf dem Markt für hypotheckenbesicherte Wertpapiere, bei denen ein Wertpapier zu einem späteren Zeitpunkt zu einem festen Preis aus einem Hypothekenpool (z. B. Ginnie Mae, Fannie Mae oder Freddie Mac) gekauft wird. Zum Zeitpunkt des Kaufs ist nicht genau bekannt, um welches Wertpapier es sich handelt, im Wesentlichen verfügt es jedoch über die genannten Merkmale. Auch wenn der Preis zum Zeitpunkt des Kaufs festgelegt wurde, steht der Marktwert noch nicht fest. TBA-Positionen werden im Wertpapierbestand aufgeführt. Der Kauf derartiger Positionen wurde noch nicht abgeschlossen und in den Veränderungen des Nettovermögens wird der entsprechende Betrag der bei Abschluss der Transaktion fälligen Zahlung unter „Verbindlichkeiten aus Kauf von Wertpapieren“ aufgeführt. Realisierte Nettogewinne/(-verluste) aus TBAs und Änderungen nicht realisierter Gewinne/Verluste werden in der Aufwands- und Ertragsrechnung unter der Überschrift „Realisierter Nettogewinn/(-verlust) aus verkauften Wertpapieren“ und „Veränderung des nicht realisierten Nettogewinns / (-verlusts) aus Wertpapieranlagen und aus Verbindlichkeiten aus reversen Pensionsgeschäften“ aufgeführt. MBS-/ABS-Risiko Hypotheckenbesicherte und forderungsbesicherte Wertpapiere (MBS und ABS) haben normalerweise ein Vorauszahlungs- und Verlängerungsrisiko und können ein überdurchschnittliches Liquiditäts-, Kredit- und Zinsrisiko haben.

- **Realisierter Nettogewinn/ (-verlust) aus Verkäufen von Wertpapieren** - Der „Realisierte Nettogewinn/(-verlust) aus verkauften Wertpapieren“ in der Aufwands- und Ertragsrechnung für das Nettovermögen spiegelt die Differenz zwischen den Kosten und Erträgen der Wertpapiere wider, einschließlich der markt- und währungsbedingten Auswirkungen.
- **Transaktionskosten** - Die Transaktionskosten beinhalten Maklergebühren und Gebühren der Depotstelle für Transaktionen mit Wertpapieren und Derivaten. Die Transaktionsgebühren sind nicht in den Kosten der gehandelten Wertpapiere und Derivate enthalten. Alle diese Gebühren werden in der Aufwands- und Ertragsrechnung für das Nettovermögen unter der Rubrik „Transaktionsgebühren für Makler“ aufgeführt. Siehe Anmerkung 23 zur Annahme und Übermittlung von Auftragsgebühren.
- **Differenzkontrakte (CFD)** - An jedem Bewertungstag wird der Preisunterschied zwischen der Anfangsnotierung und dem aktuellen Marktpreis des dem CFD zugrunde liegenden Wertpapiers bzw. Index als Marktwert (nicht realisierter Gewinn oder Verlust) festgehalten; wenn der Teilfonds ein Abschlussgeschäft tätigt, wird die Differenz zwischen dem Nominalwert des Eröffnungs- und Abschlussgeschäfts des zugrunde liegenden Wertpapiers in der Aufwands und Ertragsrechnung für das Nettovermögen unter den Rubriken Realisierter Nettogewinn/(-verlust) aus Swaps und CFD als realisierter Gewinn oder Verlust festgehalten. Ersteinschusszahlungen können bei Abschluss des CFD in bar erfolgen. Der Teilfonds zahlt oder erhält regelmäßig nachfolgende Zahlungen, die Schwankungsmargen genannt werden. Sie basieren auf Änderungen des Marktwerts offener CFD-Kontrakte.
- **Wertpapierbeleihungen** - Bei Transaktionen mit Wertpapierbeleihungen überträgt ein Verleiher Wertpapiere oder Instrumente an einen Entleiher und der Entleiher verpflichtet sich dazu, zu einem zukünftigen Zeitpunkt oder auf Bitte des Verleihers gleichwertige Wertpapiere oder Instrumente zurückzugeben. Der Entleiher muss eine Sicherheit als Garantie bereitstellen, die sich über die Leihfrist erstreckt und mindestens gleichwertig ist mit der allgemeinen Bewertung der verliehenen Wertpapiere zuzüglich dem Wert von Sicherheitsabschlägen, die angesichts der Qualität der Sicherheit als angemessen erachtet werden.

3 VERWENDETE WECHSELKURSE ZUM 30. JUNI 2025

Für die Konsolidierung wurden folgende Wechselkurse zugrunde gelegt:

1 JPY = 0.005898 EUR
 1 USD = 0.851898 EUR

4 MANAGEMENT-, VERWALTUNGS- UND VERTRIEBSGEBÜHREN

Gebührenstruktur - Die Verwaltungsgebühren werden als prozentualer Anteil des NIW der Teilfonds und der Anteilklassen ausgewiesen und schließen sämtliche Verwaltungsausgaben des Fonds ein.

Diese Gebühren umfassen die Vergütung für Verwaltungsstelle, Domizilstelle, Transferstelle und Registrierstelle für deren Leistungen gegenüber dem Fonds. Ebenso enthalten sind die Vergütung der Dienstleistungen der Depotstelle für den Fonds sowie alle weiteren Verwaltungsausgaben, die bei den Geschäften des Fonds entstehen. Diese umfassen unter anderem:

- Honorare der Wirtschaftsprüfer und Rechtsberater des Fonds (einschließlich der Kosten für die Einhaltung der gesetzlichen und regulatorischen Anforderungen);
- Kosten für Übersetzung, Druck und Zustellung der Jahres- und Halbjahresberichte, des Verkaufsprospekts, der Produktinformationsblätter der einzelnen Anteilklassen einschließlich etwaiger diesbezüglicher Ergänzungen sowie von Mitteilungen, die an die Anleger gesendet werden;
- alle Kosten, die im Rahmen der Informierung der Anleger angefallen sind, einschließlich der Kosten für die Veröffentlichung von Aktienkursen in der Finanzpresse sowie der Herstellung von Informationsmaterialien für Zeichner und Vertriebsorganisationen;
- alle Gebühren und Aufwendungen für die anfängliche und fortwährende Registrierung des Fonds bei Regierungsbehörden oder Wertpapierbörsen sowie für die Erfüllung jeglicher regulatorischer Anforderungen und die Erstattung dieser Gebühren und Aufwendungen, die bei lokalen Vertretern entstanden sind;
- Gebühren sämtlicher lokaler Vertreter/Korrespondenzpartner, deren Leistungen nach geltender Gesetzgebung erforderlich sind;
- Kosten für außerordentliche Maßnahmen, insbesondere Gutachten oder Verfahren zum Schutz der Interessen der Anteilseigner;
- Kosten für Übersetzung, Zustellung und Veröffentlichung sämtlicher Mitteilungen an die Anteilseigner.

Die Verwaltungsgebühr wird rückwirkend mit von der Verwaltungsgesellschaft bestimmter Häufigkeit an Amundi Luxembourg S.A. gezahlt und täglich für jeden Teilfonds und jede Anteilklasse berechnet.

Die Managementgebühren werden als Prozentanteil des NIW ausgewiesen, rückwirkend mit von der Verwaltungsgesellschaft bestimmter Häufigkeit an Amundi Luxembourg S.A. gezahlt und täglich für jeden Teilfonds auf Grundlage des täglichen NIW jeder Anteilklasse berechnet.

Amundi Luxembourg S.A. ist für die Zahlung der Gebühren an die Anlageverwalter verantwortlich.

Neben den Managementgebühren, die der Fonds an Amundi Luxembourg S.A. zahlen muss, fallen für die Teilfonds, die einen Teil ihrer Vermögenswerte in andere OGA investieren, auch die Managementgebühren an, die diesen Teilfonds berechnet werden, außer bei Querbeteiligungen.

Die Vertriebsgebühren werden an jedem Handelstag zu den folgenden jährlichen Sätzen berechnet und erfasst und rückwirkend mit von der Verwaltungsgesellschaft bestimmter Häufigkeit an Amundi Luxembourg S.A. gezahlt. Amundi Luxembourg S.A. ist für die Zahlung der Gebühren an die Vertriebshändler verantwortlich.

Die Verwaltungsgesellschaft kann darüber hinaus beschließen, Vertriebshändlern aus ihren eigenen Gebühren eine Vergütung zu zahlen.

Die als Prozentanteil des NIW ausgewiesenen Management-, Verwaltungs- und Vertriebsgebühren gelten zum 30. Juni 2025 und sind die auf der Website www.amundi.lu/Amundi-Funds aufgeführten Höchstsätze, außer für die Teilfonds Amundi Funds Cash EUR und Amundi Funds Cash USD, für die folgende jährliche Sätze gelten.

Bei den vorstehenden Teilfonds haben sich die angewendeten Sätze der Management- und Verwaltungsgebühren im Jahresverlauf geändert.

Nach der Aussetzung der NAV-Berechnung für Amundi Funds Russian Equity hat Amundi Luxembourg S.A. beschlossen, auf ihre Verwaltungsgebühren zu verzichten. Derselbe Gebührenverzicht gilt für die segregierte Anteilsklasse (ISIN LU2600584523) von Amundi Funds Emerging Europe Middle East and Africa, auf die alle illiquiden russischen Vermögenswerte und Verbindlichkeiten übertragen wurden.

Gemäß 46(3) des Gesetzes vom 17. Dezember 2010 werden für den zugrunde liegenden Fonds Amundi Funds Protect 90, dessen Bürge zu Crédit Agricole Group gehört, folgende Verwaltungsgebühren berechnet:

5 ERFOLGSABHÄNGIGE GEBÜHREN

Die erfolgsabhängige Gebühr wird für jede Anteilsklasse separat berechnet. Sie fällt für jede Anteilsklasse täglich an, und wird jährlich für jede Anteilsklasse abgezogen und gezahlt. Die erfolgsabhängige Gebühr wird berechnet durch den Vergleich des NIW der jeweiligen Anteilsklasse des Teilfonds mit der Wertentwicklung des Referenzwerts.

Weitere Angaben zum verwendeten Mechanismus finden Sie auf der Website www.amundi.lu/Amundi-Funds.

Die Teilfonds und die Anteilsklassen, bei denen eine erfolgsabhängige Gebühr anfällt, sind auf der Website www.amundi.lu/Amundi-Funds aufgeführt.

Bitte beachten Sie, dass für alle in Hongkong genehmigten Teilfonds eine erfolgsabhängige Gebühr gilt.

Die erfolgsabhängigen Gebühren sind im Posten „Performancegebühren“ der Erfolgsrechnung und Veränderung des Nettovermögens enthalten und außerdem im Abschnitt (nicht geprüft) Performance-Gebührenregelung aufgeführt.

6 BESTEUERUNG DES FONDS

„Taxe d'abonnement“

Der Fonds unterliegt in Luxemburg außerdem einer Steuer von 0.05 % p. a. für aktienbasierte Teilfonds, Anleihetiefonds, Multi-Asset-Teilfonds, geschützte Teilfonds und Absolute-Return-Teilfonds, mit Ausnahme von Anlagen dieser Teilfonds in anderen Organismen für gemeinsame Anlagen mit Sitz in Luxemburg, die der gesetzlichen *Taxe d'abonnement* unterliegen und 0.01 % p. a. für Cash-Teilfonds, die Anteilsklassenkategorie H, die Anteilsklassenkategorie I, die Anteilsklassenkategorie J, die Anteilsklassenkategorie M, die Anteilsklassenkategorie O, die Anteilsklassenkategorie OR, die Anteilsklassenkategorie SE, die Anteilsklassenkategorie X und die Anteilsklassenkategorie Z sämtlicher dieser Teilfonds („Taxe d'Abonnement“). Diese Steuer ist vierteljährlich auf Grundlage des NIW des Fonds am Ende des entsprechenden Kalenderquartals zu zahlen.

Der Vorteil des Satzes der „Taxe d'Abonnement“ von 0.01% p. a. kommt denjenigen Anteilseignern zugute, die auf Grundlage der luxemburgischen gesetzlichen, aufsichtsrechtlichen und steuerlichen Vorschriften für die Anteilsklassenkategorie H, die Anteilsklassenkategorie I, die Anteilsklassenkategorie J, die Anteilsklassenkategorie M, die Anteilsklassenkategorie O, die Anteilsklassenkategorie OR die Anteilsklassenkategorie SE, die Anteilsklassenkategorie X und die Anteilsklassenkategorie Z zugelassen sind, soweit dies dem Fonds zum Zeitpunkt der Zulassung eines Anlegers für diese Anteilsklasse bekannt ist.

Es kann diesbezüglich jedoch keine Gewähr für die Vergangenheit und die Zukunft gegeben werden. Diese Beurteilung hängt von den jeweiligen Auslegungen des Status eines in Frage kommenden Anlegers in der Anteilsklassenkategorie H, der Anteilsklassenkategorie I, der Anteilsklassenkategorie J, der Anteilsklassenkategorie M, der Anteilsklassenkategorie O, der OR, der Anteilsklassenkategorie SE, der Anteilsklassenkategorie X und der Anteilsklassenkategorie Z ab, die durch die jeweils zuständigen Behörden erfolgen. Jede von den Behörden vorgenommene Neufestsetzung des Status von Anlegern kann dazu führen, dass die gesamte Anteilsklasse dem jährlichen Satz der „Taxe d'Abonnement“ von 0.05% unterworfen wird.

Indische Steuer

Jeder Teilfonds kann in bestimmten Ländern, in die er investiert, der Körperschaftsteuer unterliegen. Kapitalgewinne, die beim Verkauf indischer Wertpapiere durch einen Teilfonds realisiert werden, unterliegen in Indien der Kapitalertragsteuer. Diese wird im Abschnitt „Erfolgsrechnung und Veränderung des Nettovermögens“ unter der Überschrift „Steuern“ ausgewiesen. Die Steuer wird auf realisierte Nettogewinne berechnet; realisierte Nettoverluste, die die Gewinne am Ende des indischen Geschäftsjahres übersteigen, können unter bestimmten Voraussetzungen bis zu acht aufeinanderfolgende Geschäftsjahre vorgetragen und mit zukünftigen Gewinnen verrechnet werden. In diesem Zusammenhang können kurzfristige Kapitalverluste (d. h. bei einer Haltedauer von weniger als 12 Monaten) sowohl mit langfristigen als auch mit kurzfristigen Kapitalgewinnen verrechnet werden, während langfristige Kapitalverluste nur mit langfristigen Kapitalgewinnen verrechnet werden dürfen. Nach indischem Steuerrecht wird auf realisierte Nettogewinne aus dem Verkauf indischer Wertpapiere innerhalb eines Jahres nach Erwerb eine Steuer von 20 %⁽¹⁾ (zuzüglich Solidaritätszuschlag sowie Gesundheits- und Bildungsabgabe) erhoben. Beim Verkauf nach mehr als 12 Monaten beträgt die Steuer auf langfristige Kapitalgewinne 12,5 %⁽²⁾ (ebenfalls zuzüglich der genannten Zuschläge). Diese Steuer in Höhe von 12,5 % auf langfristige Kapitalgewinne aus indischen Wertpapieren gilt seit dem 1. April 2018.

Die Entscheidung, Rückstellungen für indische Steuern zu bilden, wird für jeden Teilfonds gemäß einem detaillierten Verfahren getroffen.

Gegebenenfalls werden tägliche Rückstellungen in den Büchern des Teilfonds erfasst und in der Position „Sonstige Verbindlichkeiten“ in der Nettovermögensaufstellung ausgewiesen.

⁽¹⁾ 15 % bis zum 15. August 2024

⁽²⁾ 10 % bis zum 15. August 2024

7 SONSTIGE ERTRÄGE

Beträge aus der Rubrik „Sonstige Erträge“ in der Ertrags- und Aufwandsrechnung und Veränderungen des Nettovermögens umfassen hauptsächlich Gewinne aus Wertpapierbeleihungen, sowie Auflösungen der Rückstellungen für Performancegebühren.

8 SONSTIGE AUSGABEN

Salden aus der Rubrik „Sonstige Auswendungen“ in der Ertrags- und Aufwandsrechnung und Veränderungen des Nettovermögens beinhalten hauptsächlich sonstige Steuern und Kosten aus Wertpapierbeleihungen.

Beträge sonstiger Aufwendungen in der Ertrags- und Aufwandsrechnung und den Veränderungen des Nettovermögens der Teilfonds Amundi Funds Emerging Markets Equity Select, Amundi Funds Emerging Markets Equity Focus, Amundi Funds Emerging World Equity, Amundi Funds SBI FM India Equity, Amundi Funds India Equity Contra, Amundi Funds Emerging Markets Blended Bond und Amundi Funds Multi-Asset Climate beinhalten hauptsächlich indische Steuern.

9 REVERSE PENSIONS GESCHÄFTE

Während des zum 30. Juni 2025 abgeschlossenen Geschäftsjahres haben einige Teilfonds umgekehrte Pensionsgeschäfte getätigt, deren Höhe im folgenden Abschnitt in der Währung des Teilfonds angegeben wird, bei denen sie Finanzinstituten Darlehen über einen bestimmten, besicherten Betrag gewährten. Am 30. Juni 2025 sind die Darlehen auf der Grundlage dieser Übereinkünfte durch folgende Basiswerte besichert.

Die Länder der Gegenparteien werden gemäß dem Standard ISO 3166-1 aufgeführt.

Der Betrag im Bereich Investment Grade bezieht sich auf Anleihen, die S&P mit mindestens BBB- und Moody's mit mindestens Baa3 einstuft.

In Anmerkung 17 finden Sie genauere Informationen zu den Sicherheiten.
